Detectives Gather Evidence Against Keepers of Houses of Prostitution.

SOME OTHER IRREGULARITIES.

A Notorious Woman's Miserable End—Her Career in Omaha—The Female Base Ballists—The Investigation—Other Matters.

Moving on the Madames.

The detective fund which was recently allowed Marshall Cummings by the city council has already been put to some use and yesterday its first results were reported to the police department.

The facts in the cases were gathered by two detectives, engaged by Marshall Cummings under the new ordinance, who have been spending two nights in visiting the principal bawdy houses.

It was reported on the street that the young ladies were in town, and after diligent inquiry it was found that they were occupying their private car, which stood near the Burlington & Missouri depot.

One of the strongest reasons Marshall Cummings had for wishing the ordinance in regard to the detective fund to pass the council, was on account of the disregard of the liquor law by keepers of respectable houses.

By instruction of the city council at its last meeting, the marshal has been investigating other license irregularities.

Life's Fifth Fever Over.

After a life of pain and pleasure, dissipation and reform, crime and repentance, there died at Kansas City a day or two ago a woman whose name at one time was known throughout the length and breadth of the land—Eva Lloyd.

Eva Lloyd, as she was called, came to Omaha two or three years ago from Chicago under an assumed name.

She worked faithfully and well, and was held high in the esteem of her employers.

She was married to a man who was a dissipated man, and she finally, through some mischance, her husband was killed.

She secured a place at the Cannon house, and there she conducted herself upright.

of the country. She was defended by Emory A. Storrs, and his brilliancy and the sympathy which he excited resulted in her acquittal.

Female Acrobat.

There was a good deal of disappointment manifest on the countenance of many young men—and old ones, too—yesterday morning when the state of the weather first greeted their senses.
